

# **Materi Lanjutan 2**

## **Flutter 2**

## Widgets (reusable component)

### 1. theme.dart

```
import 'package:flutter/material.dart';
import 'package:google_fonts/google_fonts.dart';

Color blueColor = const Color(0xFF2a3955);
Color yellowColor = const Color(0xFFFF8B600);
Color blackColor = const Color(0xFF000000);

Color dangerColor = const Color(0xFFf42929);
Color successColor = const Color(0xFF28A745); // Mirip Bootstrap Success
Color infoColor = const Color(0xFF4287f5); // Mirip Bootstrap Success

Color waitingColor = const Color(0xFFFF9fb07);

Color greennColor = const Color(0xFF32cd32);

Color whiteColor = const Color(0xFFFFFFFF);
Color shadowColor = const Color(0xFF808080);
Color greyColor = const Color(0xFFC0C0C0);

Color cardRed = const Color(0xFFffa7a7);
Color cardBlue = const Color(0xFF9495ed);
Color cardGreen = const Color(0xFF7eed6e);
Color cardYellow = const Color(0xFFf7dc6f);

FontWeight medium = FontWeight.w400;
FontWeight bold = FontWeight.w500;
FontWeight extraBold = FontWeight.w600;

TextStyle mediumText10 = GoogleFonts.poppins(fontSize: 10, fontWeight: medium);
TextStyle mediumText12 = GoogleFonts.poppins(fontSize: 12, fontWeight: medium);
TextStyle mediumText13 = GoogleFonts.poppins(fontSize: 13, fontWeight: medium);
TextStyle mediumText14 = GoogleFonts.poppins(fontSize: 14, fontWeight: medium);

TextStyle mediumText16white =
  GoogleFonts.poppins(fontSize: 16, fontWeight: medium, color: whiteColor);
TextStyle mediumText16 = GoogleFonts.poppins(fontSize: 16, fontWeight: medium);
TextStyle mediumText =
  GoogleFonts.poppins(fontSize: 14, fontWeight: bold, color: blueColor);
TextStyle mediumTextWhite =
  GoogleFonts.poppins(fontSize: 14, fontWeight: bold, color: whiteColor);
TextStyle largeText = GoogleFonts.poppins(
  fontSize: 18,
  fontWeight: bold,
  color: blueColor,
);
TextStyle largeTextred = GoogleFonts.poppins(
  fontSize: 18,
  fontWeight: bold,
```

```

    color: dangerColor,
  );
  TextStyle largeTextWhite =
    GoogleFonts.poppins(fontSize: 20, fontWeight: bold, color: whiteColor);

  TextStyle largeTextShadow = GoogleFonts.poppins(
    fontSize: 20,
    fontWeight: FontWeight.bold, // Gantilah 'bold' dengan FontWeight.bold
    color: blueColor, // Gantilah 'whiteColor' dengan Colors.white
    shadows: [
      Shadow(
        offset: Offset(2.0, 2.0), // Posisi shadow
        blurRadius: 3.0, // Jarak blur shadow
        color: greyColor.withOpacity(0.5), // Warna shadow dengan transparansi
      ),
    ],
  );

  TextStyle mediumTextShadow = GoogleFonts.poppins(
    fontSize: 14,
    fontWeight: FontWeight.bold, // Gantilah 'bold' dengan FontWeight.bold
    color: blueColor, // Gantilah 'whiteColor' dengan Colors.white
    shadows: [
      Shadow(
        offset: Offset(2.0, 2.0), // Posisi shadow
        blurRadius: 3.0, // Jarak blur shadow
        color: greyColor.withOpacity(0.5), // Warna shadow dengan transparansi
      ),
    ],
  );

  TextStyle extraLargeText =
    GoogleFonts.poppins(fontSize: 24, fontWeight: bold, color: whiteColor);

  TextStyle extraCardText = GoogleFonts.poppins(fontSize: 24, fontWeight: bold);
  TextStyle mediumCardText = GoogleFonts.poppins(fontSize: 18, fontWeight: bold);
  TextStyle mediumCardTextBlue =
    GoogleFonts.poppins(fontSize: 18, fontWeight: bold, color: blueColor);

  TextStyle mediumCardTextWhite =
    GoogleFonts.poppins(fontSize: 18, fontWeight: bold, color: whiteColor);

```

## 2. assets\_locations.dart

```

import 'package:flutter/material.dart';

class AssetLocations {
  static AssetImage iconLocation(String iconName) {
    return AssetImage('assets/images/$iconName.png');
  }
}

```

```

}

static AssetImage iconLetak(String iconName) {
  return AssetImage('assets/icons/$iconName.png');
}
}

```

### 3. app\_bar\_back.dart

```

import 'package:app_wo/utils/theme.dart';
import 'package:flutter/material.dart';
import 'package:flutter_feather_icons/flutter_feather_icons.dart';
import 'package:get/get.dart';

class AppBarBack extends StatelessWidget implements PreferredSizeWidget {
  const AppBarBack(
    {super.key,
    required this.title,
    this.isSearchMode = false,
    this.searchController,
    this.onChanged});

  final String title;
  final bool isSearchMode;
  final TextEditingController? searchController;
  final ValueChanged<String>? onChanged;

  @override
  Widget build(BuildContext context) {
    return AppBar(
      backgroundColor: blueColor,
      leading: IconButton(
        icon: Icon(
          FeatherIcons.chevronLeft,
          size: 30,
          color: whiteColor,
        ),
        onPressed: () {
          Get.back(result: true); // Kembali ke halaman sebelumnya
        },
      ),
      shadowColor: shadowColor,
      elevation: 2,
      title: isSearchMode
        ? TextField(
            controller: searchController,
            style: mediumCardText.copyWith(color: whiteColor),
            decoration: InputDecoration(
              hintText: 'Search $title...',

```

```
        hintStyle: mediumText14.copyWith(color: whiteColor),
        border: InputBorder.none,
      ),
      onChanged: onChanged,
    )
    : Text(
      title,
      style: mediumCardText.copyWith(color: whiteColor),
    ),
  );
}

@override
Size get preferredSize => const Size.fromHeight(kToolbarHeight);
}
```

#### 4. button\_form\_style.dart

```
import 'package:app_wo/utils/theme.dart';
import 'package:flutter/material.dart';

class ButtonFormStyle extends StatelessWidget {
  const ButtonFormStyle({
    super.key,
    required this.textName,
    required this.onTap,
    this.isLoading = false,
    this.widthSize,
    this.iconName,
    this.color = const Color(0xFF8B600),
    this.style,
    this.colorIcon});

  final String textName;
  final Function() onTap;
  final bool isLoading;
  final double? widthSize;
  final IconData? iconName;
  final Color? color;
  final Color? colorIcon;
  final TextStyle? style;

  @override
  Widget build(BuildContext context) {
    return SizedBox(
      width: widthSize ?? MediaQuery.of(context).size.width,
      height: 50, // Biar lebih rapi kalo pakai loading
      child: TextButton(
        onPressed: isLoading ? null : onTap,
        style: TextButton.styleFrom(
          backgroundColor: color,
          shape: RoundedRectangleBorder(
            borderRadius: BorderRadius.circular(10),
          ),
        ),
        child: isLoading
          ? const CircularProgressIndicator(
              color: Colors.white,
            )
          : Row(
              mainAxisAlignment: MainAxisAlignment.center,
              children: [
                Icon(
                  iconName,
                  color: colorIcon ?? blueColor,
                ),
                SizedBox(
                  width: 8,
```

```

    ),
    Text(
      textName,
      style: style ?? largeText,
    ),
  ],
),
),
);
}
}

```

## 5. card\_dashboard

```

import 'package:app_wo/utils/theme.dart';
import 'package:flutter/material.dart';

import '../utils/asset_locations.dart';

class CardDashboard extends StatelessWidget {
  const CardDashboard({
    super.key,
    required this.textLabel,
    required this.subLabel,
    required this.iconSize,
    required this.iconName});

  final String textLabel;
  final String subLabel;
  final double iconSize;
  final String iconName;

  @override
  Widget build(BuildContext context) {
    return Padding(
      padding: const EdgeInsets.symmetric(horizontal: 18, vertical: 6),
      child: Card(
        color: whiteColor,
        elevation: 0.5,
        shape: RoundedRectangleBorder(
          borderRadius: BorderRadius.circular(8),
          side: BorderSide(
            color: shadowColor.withOpacity(0.3),
          ),
        ),
        child: Row(
          children: [
            Padding(
              padding: const EdgeInsets.all(16),
              child: Image(

```

```

        image: AssetLocations.iconLetak(iconName),
        width: iconSize,
      ),
    ),
    Column(
      crossAxisAlignment: CrossAxisAlignment.start,
      mainAxisAlignment: MainAxisAlignment.center,
      children: [
        Text(
          textLabel,
          style: largeText,
        ),
        Text(
          subLabel,
          style: mediumText,
        )
      ],
    ),
  ],
),
);
}
}

```

### Tugas

- Buatlah 5 widget diatas di project flutter new\_app
- Buat 2 halaman lengkap dengan navigation route dan implementasikan 5 widget diatas
